

architectural BRONZE CASEMENTS

MULTI-FOLDING DOOR OPTIONS

Multi folding doors function by allowing for three to six doors to operate in unison, providing a single opening for unrivalled views and access to the outdoors.

Dependent on the number of doors within the opening & how these are divided, it is usually possible to incorporate a single door or a pair of French doors within the multi folding door set for day to day use. A four leaf door set with two doors opening each way, does not feature French doors or a single door to open independently and as such are not suitable for a main access door.

architectural BRONZE CASEMENTS

MULTI-FOLDING DOOR OPTIONS

Doors can be fitted with a Banham mortice hook lock and escutcheon plate in a bronze colour. Doors are pulled and pushed open by means of a pull handle and secured with a lockable recessed shoot bolt top and bottom.

RECESSED SHOOT BOLT TOP

RECESSED SHOOT BOLT BOTTOM

Doors are secured with a combination of recessed shoot bolts, multipoint hook deadlocks or 5 lever door locking systems to best suit individual requirements & to complement other ironmongery within the rest of the property.

As these various elements have to be sourced from different suppliers to ensure that the very best functionality is achieved, the ironmongery finish is restricted to a dark bronze colour to match with other handles available for our window and door systems. Your designer will advise on the best options to suit the individual requirements of your project.

BRONZE

Whilst called "Bronze", this ironmongery is very dark, almost appearing black under most light conditions.

When fully opened the doors will stack at the ends of the opening at approximately 90° to the framework. These are then held open by a combination of retaining magnets or cabin hooks where magnets are not suitable. French doors & single doors will open as close as possible to 180°, whilst doors hinged from the side frame, opposed to hinging off an adjacent door leaf will only open to 90°.

OTHER IRONMONGERY HANDLES/PULLS/MAGNETS

BANHAM LOCK WITH ESCUTCHEON PLATE

TOP TRACK AND CARRIER HINGE

MAGNETIC DOOR CATCH

INTERNAL PULL HANDLE

OTHER COMBINATIONS OF IRONMONGERY MAY BE AVAILABLE DEPENDING ON PROJECT SPECIFICATIONS.
